Central Vacuum Cleaner System

Our company, which exists in the building automation sector for more than a quarter of a century, has combined its knowledge and experience under the name of VACKON in 2015. It has a wide customer base with its manufacturing, sales, installation and technical service in the field of Central Vacuum Cleaner Systems, with the prior principle to present innovative, high quality and safe service.

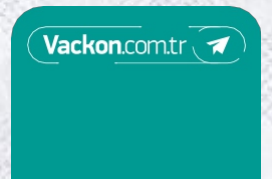

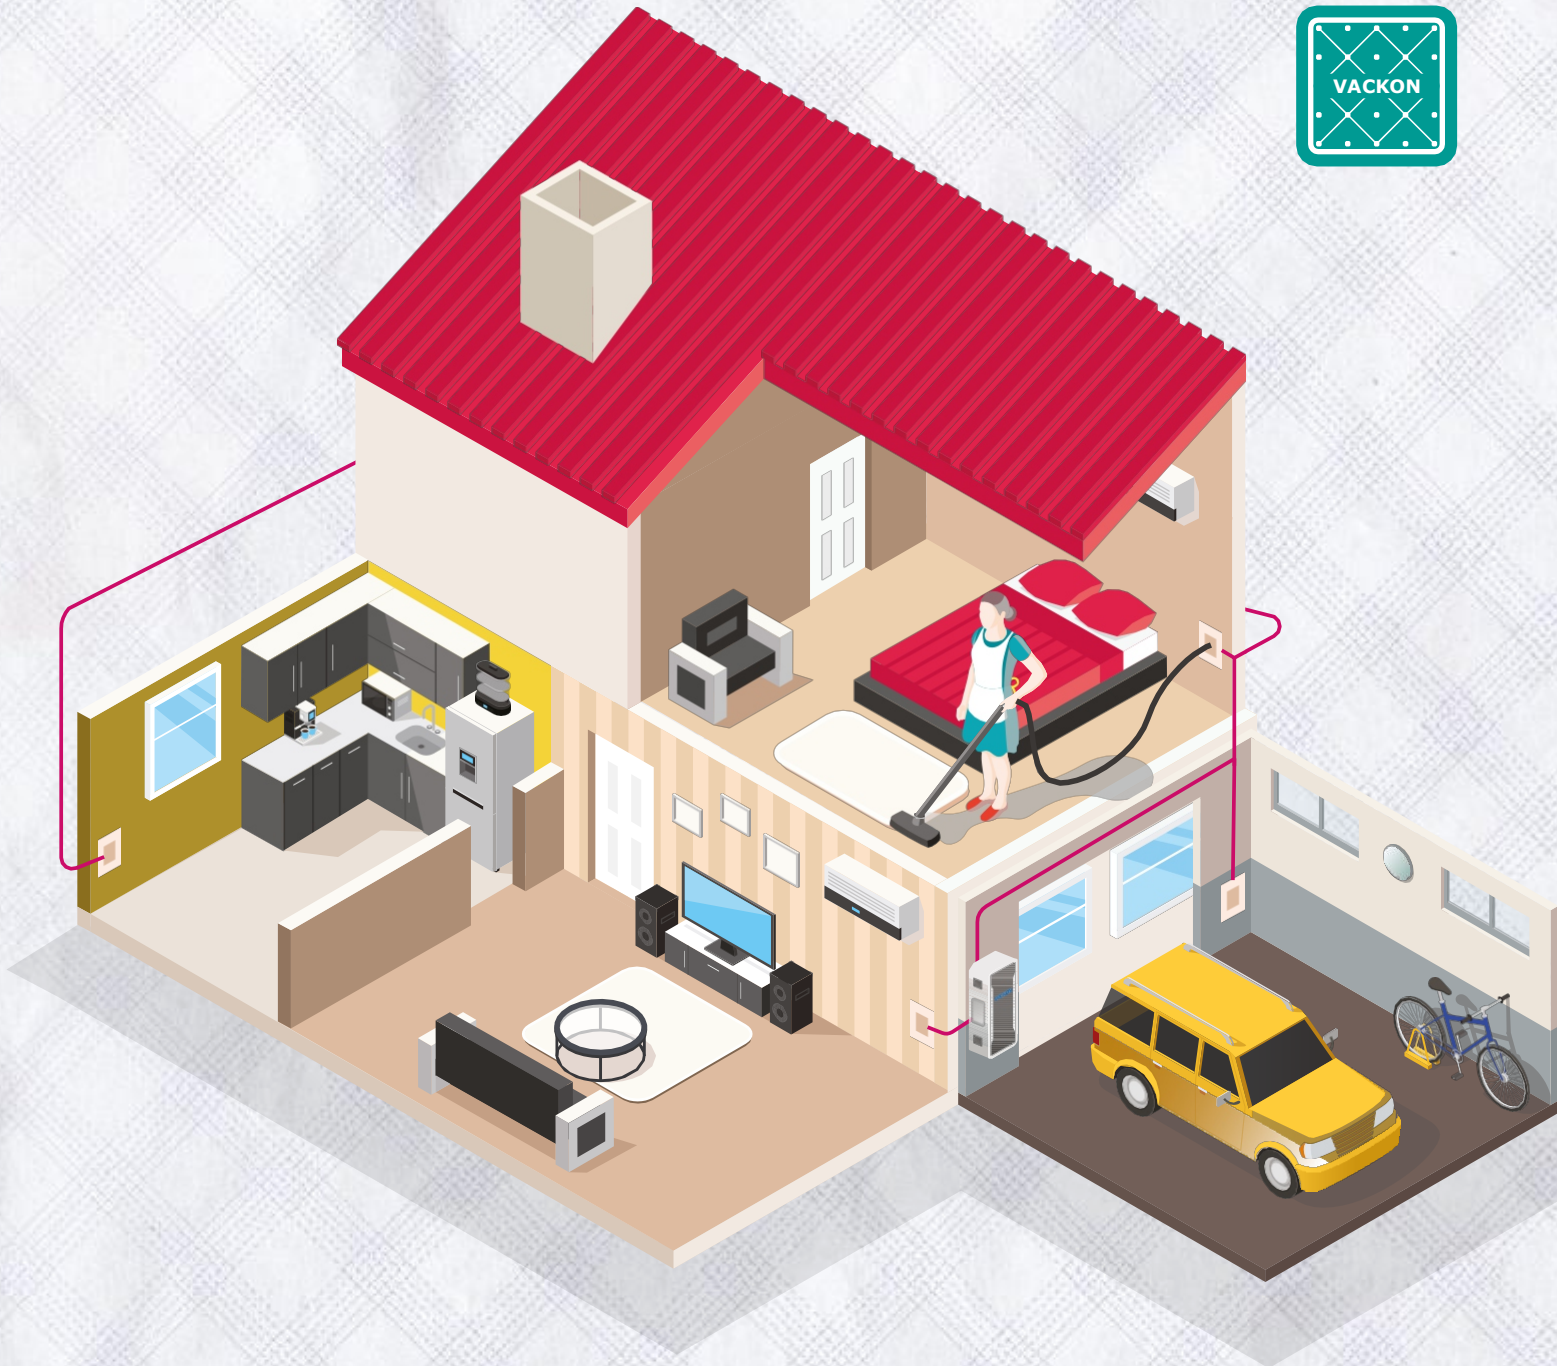

Our mission; To provide reliable and qualified services without compromising any attribute jointly with an environmental sensitivity in the name of CLEANING and HEALTH which is one of the most important values of human beings.

Our vision; To hold customer satisfaction at the highest level with an exemplary service approach that can integrate the most advanced technology into our products and reach large masses.

Design, Technology and Innovation Together

VACKON Central Vacuum Cleaner System is a new and revolutionary cleaning system. A replacement for traditional portable vacuum cleaners that can be placed in projects under construction, warehouse, garage, basement, cellar and so on, that is based on the establishment of a powerful central vacuum unit. VACKON Central Vacuum System offers you the best in quality, design and innovation.

NEW GENERATION VACUUM CLEANER

UNIQUE

FORCE

**Our commitment to the environment
is the legacy we will leave to our
children...**

It has been scientifically proven that products in our homes like vacuum cleaners and mixers etc. emit radiation. VACKON Central Vacuum Cleaner Systems do not emit radiation.

VACKON systems are silent. It does not create noise pollution and discomfort.

In traditional vacuum cleaner systems, dust and mites spread to the atmosphere. It is much more hygienic as all the dust collected in VACKON systems is transferred to the central unit.

It is the best solution to improve the quality of life, especially for people who are sensitive to dust.

It improves the indoor air quality significantly.

VACKON OFFERS INDUSTRIAL SOLUTION

Take cleaning to the next level with the VACKON professional series, which allows multiple users to clean areas at the same time in places such as hotels, dormitories, business centers, worship centers, factories, etc.

EVERYWHERE NEEDED

YOU ARE IN CONTROL

The VACORY industrial vacuum cleaner is completely computer-equipped.

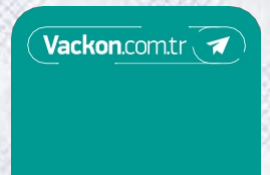

- It provides simultaneous use in multiple sockets, all connected to the same unit.
 - Thanks to its smart management, it allows you to control it from your computer.
 - It controls the installation thanks to its smart system and warns you against leakage.
 - It has an IP protection rating.
 - It has 1st class insulation and is very silent.
 - It has an unlimited modular system.

AUTOMATIC FILTER CLEANING SYSTEM

VACKON Professional vacuum units have an automatic filter cleaning system. The reverse compressed air passes through the filter and the dust on the filter surface or between the folds falls into the dustbin.

REMOTE CONNECTION

It is possible to remotely check the status of the central vacuum system. All information can be accessed from the PC screen with any terminal that is connected to the network.

RETRA FLEX

Pull the hose as you need and connect it with the annex.

Pull the black lever to start the system and lock the tubing to the desired length.

Push the lever to unlock the hose.

To retract the hose, disconnect the annexes and place your hand over the open hole.

Close the cover to stop the system.

RETRAFLEX PRACTICAL AND COMFORTABLE

With the revolutionary retractable hose system, RetraFlex lets you use as many hoses as you need to remove dirt. Not less, not more. After cleaning, the hose will be hidden in the vacuum cleaner installation on the walls and floor of your house only through the suction power generated by the central vacuum cleaner without any additional mechanical pulleys, springs or electrical winding systems, to ensure dependable function.

You never have to carry an annoying cabinet with a broom hose and store it in the closet again. **The hose is automatically hidden in the wall!**

The Retraflex system can be easily installed when constructing a house or renovating an existing home.

**WALLY
FLEX**

In the bathroom...

WallyFlex works great for removing hair and makeup residue from bathroom counters easily.

In the kitchen ...

What is better to discover cake, food and breadcrumbs than WallyFlex?

In the garage...

With WallyFlex, it's easy to clean your car in the comfort of your garage.

**New and
Black**

WALLYFLEX: A CLEANING SOLUTION FOR SMALL SPACES

Wally Flex can be easily installed almost everywhere in the house. In kitchens, bathrooms, laundry rooms and in closets... The Wally Flex consists of a retractable and extendable hose to quickly pick up dust and dirt without taking out the traditional vacuum hose. It is normally mounted on a wall at the most suitable and desired height and connected to the central vacuum hose network. It uses the central vacuum power and suction to quickly remove any dust or crumbs. The hose can be extended to a length of approximately 4 meters and retracted to a length of 60 cm when it is not in use.

HYGIENIC AND HEALTHY LIFE

Wall sockets

It is fully compatible with your home with its stylish design and different color options.

Corded handset

In the wired connection, the system starts to work when the hose set is plugged into the socket. It automatically shuts off when the hose is removed.

Wireless handset

Thanks to the level keys and control keys on the systems handset, the vacuum power can be adjusted, the system can be operated or stopped remotely in the wireless connection. When you want to take a break while continuing the cleaning, you can stop the hose from the handset without having to disassemble it, and continue cleaning by restarting it whenever you want.

For New Beginnings...

VACKON offers modern, professional and easy cleaning.

More hygiene in your living spaces affects your life quality in a positive way.

INCREASE YOU LIFE QUALITY

Light and comfortable cleaning

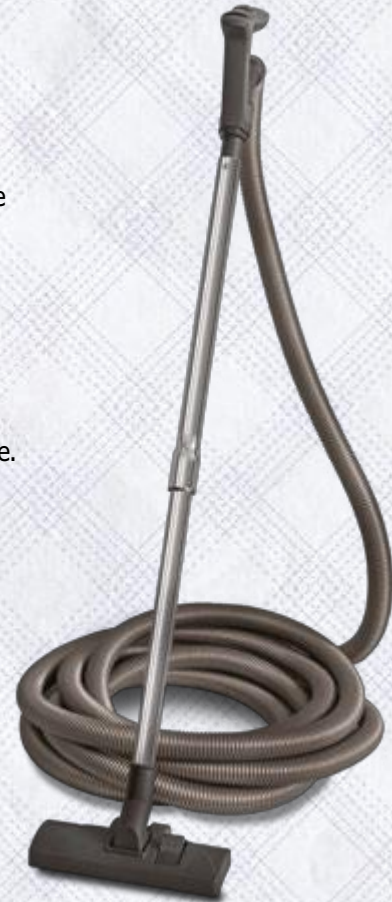

Let vacuuming and cleaning your house cease to be a weight training exercise. Get rid of the portable vacuum behind you while vacuuming and get comfortable cleaning with the extremely light hose set.

Feel the power

The suction power of VACKON Central Vacuuming Systems is much higher than normal vacuum cleaner systems. The suction power does not decrease over time. It provides high performance from the first day to the last day.

Quiet and noiseless

Enjoy the silence, the conversation you have or the music you listen to while cleaning. All you will hear will be the sound of the air being sucked in.

UNIQUE

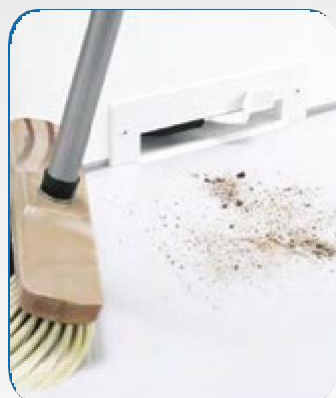

Fireplace cleaning apparatus

It can be used in places such fireplace, tiled stove, barbecue and so on.

It is also suitable for sand, sawdust, shards and wet floors.

Hot ash with a temperature of up to 40 °C can be drawn.

It can be used with all wet / dry vacuum cleaners.

VacPan

It is mounted on the part where the counter meets the floor in the kitchen.

When you bring the dust and crumbs to the front of it, it sends them to the main vacuum unit with its suction power .

ON-OFF Control set

It is possible to facilitate cleaning with the on/off button on the handset.

You only need to press a button to start your unit. It is a very useful and ideal system due to its flexible hose, convenience, innovation and technology.

VACPOR New generation dustpan

It is used to clean quickly and practically small things and places like bathroom and kitchen. Being easily accessible is a great advantage for small cleaning solutions. It can be kept in any standard cabinet.

WHY SHOULD YOU CHOOSE

The Central Vacuum System?

HYGIENE

In conventional vacuum systems dust and mites spread to the atmosphere. It is much more hygienic as all the dust collected in VACKON systems is transferred to the central unit.

SILENT

Enjoy the silence, the conversation you have or the music you listen to while cleaning. All you will hear will be the sound of the air drawn in.

CONFORT

Avoid carrying a heavy portable vacuum behind you while vacuuming and enjoy cleaning without getting tired thanks to the light hose set.
